

Micromat Rx™
HVAC Equipment Liner

Description

Micromat Rx™ is a flexible fiber glass equipment liner with a durable mat facing and an acrylic coating that contains an EPA registered, immobilized antimicrobial agent. It can be easily cut to any size or shape with a knife, steel rule die, or shears. Micromat Rx can be firmly bonded to metals, plastics, and other materials with commercial adhesives or mechanical fasteners. The antimicrobial agent resists the growth of bacteria and fungi. The tough acrylic coating makes Micromat Rx resistant to damage and a more practical and cost effective alternative to double wall construction.

Available Forms: See Micromat Rx purchase guide, MMRX-IS-285 for specific details.

Custom Fabrication. The Johns Manville nationwide network of Approved Fabricators specializes in secondary processing to supply custom parts to meet specific customer requirements. Die-cutting, laminating, special packaging and just-in-time delivery are just a few of the multiple capabilities our fabricators can provide.
